Drinking an ounce of Galaxy a day may allow you to receive these benefits:

- Increased energy and stamina.*
- Support the structure and function of cellular membranes.*
- Maintain healthy blood sugar levels already in the normal range.*
- Regulate healthy inflammatory response.*
- Optimize your immune system.*
- Provides antioxidants to help counter cell inflammation.*
- Promote a healthy digestive system.*
- Provides anthocyanins to support the cardiovascular system.*
- Support joint and cartilage functionality.*
- Adds essential fatty acids to aid in digestive tract function.*
- Maintain intestinal health.*
- Provides phytosterols to help maintain normal cholesterol levels.*
- Offer potent antioxidant protection against free radicals.*
- Adds amino acids for enhanced muscle activity.*
- Fight oxidative damage and signs of aging.*

And if you need an afternoon pick me up, drink another ounce.

“Galaxy additionally did not spike blood glucose levels of 308 participants during the 1 ½ hours following the normal dose of 30 mL (n=308). This was likely due to the balance of simple sugars found in the product: 16.5% xylitol; 42.2% fructose; and 41.3% glucose. In addition, Galaxy contains nine essential amino acids.”*

Booth et al., 2012 <http://www.intechopen.com/books/structure-and-function-of-food-engineering>

“Based on our data (200 mg particulates/one mL Galaxy), if a person consumes 30 mL of Galaxy per day, they would consume about 1,068 ORAC units per day or 21-36% of the recommended units per day. And if one consumes it 2X/day, the values double, or 42-72% of the recommended units.”* Dr. Gary Booth

Galaxy provides a full spectrum of beneficial ingredients that your body will thank you for.
